

The Cube and the Sphere...all life

The cube and the sphere are the two opposites of form from which all form and all life is born. The basis of all form is the "pulsing cube-sphere." All spiral forms are incomplete spheres, just as all crystalline forms are incomplete cubes. When you rotate a spiral on its axis you begin to see the development of the sphere.

A cube is born from the sphere by the desire of our creator to express *wholeness* by expanding the "Mother light" of incandescence (sphere) into the "Father light" of whole cubes. The continuous expansion and contraction of the pulsing cube-sphere is the pulse of the universe...The "Breath of God."

The purpose of Harmonia: "Water of life" is to escort humanity and this planet through the world of form and reunite us with the world of spirit, releasing us from the constraints that keep us tethered to the third-dimensional experience. This will allow us to integrate our spiritual aspects with our physical bodies!
